Addresses at
PEOPLE'S LOBBY CONFERENCE
February 9, 1946

AMERICA NEEDS AN OVER-ALL PLAN

PROGRAM FOR 1946 OF THE PEOPLE'S LOBBY

1. Public ownership of natural resources and basic industries,—to be operated by production technicians and engineers, so as to ensure maximum employment,—with labor and consumer representation.
2. Paying most costs of war by current taxation, based on ability to pay, and benefits received from Government, exempting the minimum income essential to health.
3. Government direction of farm production, and control of processing and distribution of farm products, with direct payments where needed to marginal farmers.
4. Effective government control of prices and of quality of essential consumer goods.
5. The initiation and participation of the United States Government in international arrangements, such as the control of atomic energy, money, credit, trade, natural resources and cartels, to prevent depressions and wars.
6. Opposing peacetime universal compulsory military training.
